

SWAGELOK MANCHESTER

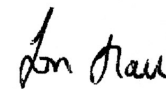

ENVIRONMENTAL POLICY

Swagelok Manchester is an exclusive authorised stockist / distributor of the valves and fittings and other fluid system components manufactured by the Swagelok Company. As a distributor our environmental impact is limited compared with the potential environmental impact of manufacturing companies. We do, however, seek to minimise our effect on the environment as much as possible. To this end we have invested in low energy lighting systems, efficient heating & water systems, target sales engineers mileage and re-use approximately 85% of all packaging received into the company.

Swagelok Company has established an effective Environmental Management System (EMS) that is structured to meet the requirements defined in **ISO 14001:2015**.
